*Irene Forte Skincare*

Our proprietary Irene Forte Skincare range achieves outstanding results with natural ingredients in formulations shaped by 35 years of skincare research and development. Based on the research of our Scientific Director Dr. Francesca Ferri- a pioneer in the medical use of plant extracts to treat skin conditions. Irene has introduced novel ingredients in products which have shown extraordinary results in independent clinical and user trials. Irene Forte Skincare products are suitable for all skin types and have even been clinically approved for sensitive skin. The core ingredients are harvested at Verdura's Organic Farm in Sicily, and alongside these we have integrated zerowaste upcycled ingredients, made from nutrient-rich plant-based leftovers. Irene's insistence on plant-based sources means all our ingredients are certified vegan. Irene Forte's approach is distinguished by her high ethical standards. In recognition of those standards, Irene Forte Skincare has already achieved B Corp status and has been awarded the Butterfly Mark by Positive Luxury for sustainable excellence.

*ishga*

The name ishga comes from the Gaelic word for water. The pure, clean waters of the Hebridean Islands off the north west coast of Scotland are home to ishga. Seaweed has been used for centuries for its natural healing and therapeutic properties. It contains natural antioxidants with properties which transform and protect skin. ishga has developed a bespoke process to extract its natural goodness, harnessing an abundance of vitamins and minerals to create a remarkable range of products for all skin types. Other ingredients, such as light base oils such as sweet almond or jojoba, essential oils like rose geranium or lemongrass, and nourishing moisturisers including cocoa and shea butters, glide blissfully on and balance, nourish, smooth and repair.
